Foreword

Development of a sound information system is critical for successful monitoring and implementation of any programme, particularly in social sectors. Design of a school information system was, therefore, accorded priority from the very beginning of the District Primary Education Programme (DPEP) in 1994, as a result of which the District Information System for Education (DISE) was developed by the National University of Educational Planning and Administration (NUEPA), New Delhi.

Importance of an Educational Management Information System (EMIS) was reiterated when *Sarva Shiksha Abhiyan* (SSA) was launched in 2001. SSA guidelines envisage development of a community-owned and transparent EMIS, and preparatory activities of the programme included substantial strengthening of MIS infrastructure in all the States and UTs of the country.

I am happy to note that NUEPA is bringing out *Flash Statistics: Elementary Education in India: Progress towards UEE* which is based on DISE data for the year 2006-07. I am confident that the state-specific indicators presented on different aspects of UEE in the volume will be used in planning for good quality elementary education, and that data users, researchers and development planners interested in the Indian education system will find the volume useful.

Based on the DISE data, an attempt has also been made to develop an Educational Development Index (EDI) which may be helpful in deciding future course of investment on elementary education in the country. I am confident that States will compute district-specific EDI as the same will help them in identifying districts that need immediate attention of planners and policy makers.

I must take this opportunity to thank UNICEF, Delhi, for consistently supporting EMIS activities since 1994, as well as NUEPA, especially Dr. Arun C. Mehta, Professor & Head, Department of EMIS and his entire team, for bringing out the present publication.

From the Vice-Chancellor's Desk

It pleases me to present the *DISE Flash Statistics: Elementary Education in India: Progress towards UEE* which is based upon the 2006-07 data. Besides launching one million plus School Report Cards, we have recently brought out significant publications namely *Elementary Education in India: Where Do We Stand?: District Report Cards, State Report Cards, and Analytical Report for the year 2005-06* which contain a large number of indicators encompassing different aspects of universalisation of elementary education. The state-specific indicators that are being disseminated through the present publication are very rich in contents. In addition, we are also going to release shortly the District and State Report Cards as well as Analytical Report for the year 2006-07.

NUEPA is committed to provide professional and technical support to all the States and UTs. This has helped in improving the capacities of both state and district level MIS officers. Further, we wish to intensify our capacity building activities in the years to come.

I thank the DISE team led by Prof. Arun C. Mehta for bringing out this publication. I hope that the researchers, policy makers, administrators and planners will find the publication both informative and useful.

(Ved Prakash)

Acknowledgements

For the last several years, NUEPA has been actively involved in strengthening the Educational Management Information System (EMIS) in the country. The *DISE Flash Statistics: Elementary Education in India: Progress towards UEE* is based on the data received from all the States & UTs of the country for the year 2006-07. Besides an Educational Development Index, the publication presents not only state-specific indicators but also brings in many new dimensions of elementary education into focus. It incorporates key indicators on all aspects of universalisation of elementary education in case of all the States & UTs of the country.

The *Flash Statistics: 2006-07* is based on the data received from as many as 1.20 million schools spread over 609 districts across 35 States & UTs. The study of this magnitude cannot be completed without the active involvement and participation of the EMIS professionals at the national and sub-national levels. I am extremely thankful to all the State Project Directors, the state level EMIS coordinators and district level programmers and data entry operators for timely supply of data.

I take this opportunity to thank UNICEF, Delhi, in particular Mr. Samphe Lhalungpa, Chief (Education) for consistently supporting EMIS activities ever since the inception of DISE and Ms Vrinda Sarup, Joint Secretary and Ms Neelam S Rao, Director, Department of School Education & Literacy, Government of India, who played a crucial role in facilitating the implementation of DISE in various states.

I am thankful to Prof. Ved Prakash, Vice-Chancellor, NUEPA, for his consistent encouragement and guidance. I take this opportunity and thank NUEPA faculty for their support.

The contribution of Shri Naveen Bhatia, Computer Programmer and Shri Shalender Sharma, Project Associate Fellow, in database management, is gratefully acknowledged.

I am also thankful to Shri S. A. Siddiqui and Ms Alka Mishra for their efficient assistance and colleagues in the Publication Unit especially Shri Pramod Rawat and Ms. Sheeja Bijju for timely bringing out the publication.

I hope that this publication will be of value to education planners, policy formulators and researchers. Suggestions for improvement are most welcome.

Arun C. Mehta

* May not present complete coverage as the information was collected for the first time

** Based upon one year enrolment data

Average repetition and drop-out rates have been computed based on data of common schools

® Computed based upon available district-wise enrolment data over five years. Hence may not represent the entire state.

NR: Data not reported

**EDUCATIONAL
DEVELOPMENT
INDEX
(EDI)**

Variables used in Computing Educational Development Index (EDI)

Component	Indicator
ACCESS	Percentage of Habitations not Served
	Availability of Schools per 1000 Population
INFRASTRUCTURE	Ratio of Primary to Upper Primary Schools/Sections (only at Upper Primary stage)
	Average Student-Classroom Ratio
	Schools with Student Classroom Ratio ≥ 60
	Schools without Drinking Water Facility
	Schools with Common Toilet
	Schools with Girl's Toilet
	Percentage of Female Teachers
TEACHERS	Pupil-Teacher Ratio
	Schools with Pupil-Teacher Ratio ≥ 60
	Single-Teacher Schools (in schools with more than 15 students)
	Percentage of Schools with ≤ 3 teachers
	Teachers without Professional Qualification
	Gross Enrolment Ratio - Overall
OUTCOMES	Scheduled Castes : Gross Enrolment Ratio*
	Scheduled Tribes : Gross Enrolment Ratio*
	Gender Parity Index in Enrolment
	Repetition Rate
	Drop-out Rate
	Ratio of Exit Class over Class I Enrolment (only at Primary stage)
	Percentage of Passed Children to Total Enrolment
	Percentage of Appeared Children passing with 60 per cent and more marks

Note:

- Indicators used for constructing EDI were pre-determined by the MHRD, Government of India
- Indicators were normalized before the Principal Component Analysis was applied to decide the factor loadings and weights
- Separate dimensional indices were constructed first before finalizing the EDI

* Data provided in Selected Educational Statistics has been used.

One Million+ School Report Cards

(www.schoolreportcards.in)

The National University of Educational Planning and Administration has created a comprehensive database on elementary education in India under one of its most prestigious projects, known as, District Information System for Education (DISE). The project covers both Primary and Upper Primary schools/sections of all the districts of the country. What is more remarkable about DISE is that it has completely eliminated the time-lag in availability of educational statistics which has come down drastically from 7-8 years to less than a year at the national and only a few months at the district and state levels. DISE is supported by the Ministry of Human Resource Development and UNICEF.

The National University has successfully developed School Report Cards of more than 1.20 million Primary and Upper Primary schools/sections. In addition to quantitative information, the Report Cards also provide qualitative information and a descriptive report about individual schools. And, all that can now be accessed with the Click of a Mouse. Even school-specific raw data has also been provided online to users.

The Report Cards are produced to provide users comprehensive information on all the vital parameters, be it student, teacher or school related variables, yet concise, accurate information about each school in a standard format which is easy to understand and allows meaningful comparisons to be made among schools. We hope that these reports are used in constructive conversations which lead to improved education for all children across the Country.
